ReduceCO2Now Website - Visual Assets Sourcing Guide

EXECUTIVE SUMMARY

This guide provides detailed recommendations for sourcing all visual assets mentioned in the content strategy documents. It includes specific image recommendations, stock photo sources, video production specifications, and multimedia asset sourcing.

What's Included:

- Hero images for each page
- Infographic specifications and sourcing
- Photography guidelines by section
- Video production recommendations
- Stock photo source recommendations
- Budget estimates for visual assets
- Implementation timeline

PART 1: IMAGE SOURCING & RECOMMENDATIONS

Hero Section Images

Hero Image 1: Earth from Space (Home Page Hero)

Purpose: Establish global perspective and urgency

Specifications:

- Resolution: 4K (3840x2160) or Full HD (1920x1080) minimum
- Aspect Ratio: 16:9 (widescreen)
- File Size: Optimized for web (under 500KB)
- Color Grading: Cool blues and greens, slightly desaturated
- Mood: Inspiring, urgent, hopeful

Recommended Sources:

Option 1: NASA Images (Free, High Quality)

- NASA Earth Observatory: https://earthobservatory.nasa.gov/
- NASA Scientific Visualization Studio: https://svs.gsfc.nasa.gov/
- Specific Image: "Blue Marble" series showing Earth from space
- License: Public domain (free to use)
- Quality: Extremely high quality, scientifically accurate

Option 2: Stock Photo Sites

- Unsplash: https://unsplash.com/ (search "Earth from space")
- Pexels: https://www.pexels.com/ (search "planet Earth")
- Pixabay: https://pixabay.com/ (search "Earth space")
- License: Free for commercial use
- Quality: Good, diverse options

Recommendation: Use NASA images for authenticity and credibility. Combine with Unsplash for additional options.

Hero Image 2: Renewable Energy Composite

Purpose: Show solutions in action

Specifications:

- Resolution: 4K or Full HD minimum
- Aspect Ratio: 16:9
- File Size: Optimized for web
- Color Grading: Vibrant greens and blues
- Mood: Dynamic, hopeful, technological

Composite Elements:

1. Solar panels in field (70% of image)
2. Wind turbines in background (20% of image)
3. Blue sky (10% of image)

Recommended Sources:

Option : Free Stock Photos

- Unsplash: "solar panels" or "wind turbines"
- Pexels: "renewable energy"
- Pixabay: "clean energy"

Recommendation: Source high-quality images from Unsplash or Pexels, then composite in Photoshop/Figma.

Hero Image 3: Diverse Community in Action

Purpose: Show global community engagement

Specifications:

- Resolution: 4K or Full HD
- Aspect Ratio: 16:9
- File Size: Optimized for web
- Diversity: Multiple ethnicities, ages, genders
- Mood: Energetic, inclusive, hopeful

Scene Description:

- Group of 5-10 people of diverse backgrounds
- Engaged in climate action (planting, protesting, discussing)
- Outdoor or community setting
- Diverse age range (youth to adults)
- Diverse gender representation
- Authentic, not overly staged

Recommended Sources:

Option 1: Free Stock Photos

- Unsplash: "climate activists" or "diverse community"
- Pexels: "people action"
- Pixabay: "environmental activism"

Option 2: Premium Sources

- Shutterstock: "climate action community"
- Getty Images: "environmental activism"

- iStock: "diverse team environmental"

Recommendation: Use free stock photos

Problem Section Images

Image 1: CO_2 Levels Chart Visualization

Purpose: Show rising CO_2 levels visually

Specifications:

- Format: Interactive infographic or static image
- Dimensions: 1200x600 pixels
- File Format: SVG (preferred) or high-res PNG
- Color Scheme: Red gradient showing danger

Data Points to Visualize:

- 800,000 years ago: ~200 ppm
- 1750: 280 ppm
- 1960: 315 ppm
- 2000: 369 ppm
- 2024: 425 ppm
- Projected 2100: 800+ ppm

Recommended Approach:

Option 1: Create Custom Infographic

- Use Figma, Adobe Illustrator, or Canva
- Create line chart showing CO_2 rise
- Add annotations for key dates
- Color zones (safe, warning, danger)
- Estimated Cost: $500-$1,500 (designer)
- Timeline: 1-2 weeks

Option 2: Use Data Visualization Tool

- Plotly: https://plotly.com/ (interactive charts)
- D3.js: https://d3js.org/ (custom visualizations)
- Chart.js: https://www.chartjs.org/ (simple charts)

Recommendation: Create custom infographic in Figma for brand consistency and visual appeal.

Image 2: Global Temperature Rise Visualization

Purpose: Show temperature increase impact

Specifications:

- Format: Area chart or gradient visualization
- Dimensions: 1200x600 pixels
- File Format: SVG or PNG
- Color Scheme: Blue to red gradient

Data Points:

- Pre-industrial baseline: 0°C
- 1960: +0.1°C
- 2000: +0.4°C
- 2024: +1.55°C
- 1.5°C threshold (critical)
- 2°C threshold (catastrophic)
- 3°C threshold (irreversible)

Recommended Approach:

- Create area chart with color zones
- Annotate thresholds and consequences
- Use gradient from blue (safe) to red (danger)
- Include timeline on x-axis

Recommendation: Create custom infographic in Figma.

Image 3: Emission Sources Pie Chart

Purpose: Show where emissions come from

Specifications:

- Format: Pie chart or donut chart
- Dimensions: 800x800 pixels
- File Format: SVG or PNG
- Color Scheme: Distinct colors per sector

Data:

- Energy & Power: 35%
- Agriculture & Food: 25%
- Industry & Manufacturing: 20%
- Transportation: 15%
- Waste & Other: 5%

Recommended Approach:

- Create pie chart with distinct colors
- Add percentage labels
- Include icons for each sector
- Add legend with detailed breakdown

Recommendation: Create custom infographic in Figma.

Solutions Section Images

Pillar 1: Fossil Fuel Phase-Out Images

Image Set 1: Coal Power Plant to Solar Farm Transition

Before Image: Coal Power Plant

- Recommended Source: Unsplash, Pexels, Pixabay
- Search Terms: "coal power plant" or "fossil fuel"
- Specifications: 1920x1080, high quality
- Mood: Industrial, outdated, polluting

After Image: Solar Farm

- Recommended Source: Unsplash, Pexels
- Search Terms: "solar farm" or "solar panels field"
- Specifications: 1920x1080, high quality
- Mood: Clean, modern, hopeful

Recommendation: Create before/after comparison using these images.

Image Set 2: Renewable Energy Facilities

Wind Turbines in Operation

- Recommended Source: Unsplash ("wind turbines"), Pexels
- Specifications: 1920x1080, clear sky background
- Mood: Dynamic, powerful, clean

Solar Panel Installation

- Recommended Source: Unsplash ("solar panels"), Pexels
- Specifications: 1920x1080, showing installation process
- Mood: Modern, technological, sustainable

Recommendation: Use both images to show diversity of renewable sources.

Pillar 2: Carbon Capture Images

Image 1: Direct Air Capture Facility

- Recommended Source: Getty Images, Shutterstock
- Search Terms: "direct air capture" or "carbon capture technology"
- Specifications: 1920x1080, showing facility
- Mood: Technological, innovative, hopeful

Image 2: Reforestation Project

- Recommended Source: Unsplash ("reforestation"), Pexels
- Search Terms: "tree planting" or "forest restoration"
- Specifications: 1920x1080, showing people planting trees
- Mood: Natural, community-driven, hopeful

Image 3: Wetland Restoration

- Recommended Source: Unsplash, Pexels
- Search Terms: "wetland restoration" or "mangrove"

- Specifications: 1920x1080, showing restored wetland
- Mood: Natural, biodiverse, restored

Recommendation: Combine technological and nature-based solutions for balanced messaging.

Pillar 3: Sustainable Food Images

Image 1: Regenerative Farm

- Recommended Source: Unsplash ("regenerative agriculture"), Pexels
- Specifications: 1920x1080, showing diverse crops
- Mood: Natural, abundant, sustainable

Image 2: Agroforestry System

- Recommended Source: Unsplash, Pexels
- Search Terms: "agroforestry" or "sustainable agriculture"
- Specifications: 1920x1080, showing trees and crops together
- Mood: Integrated, natural, productive

Image 3: Farmers Implementing Sustainable Practices

- Recommended Source: Unsplash, Pexels
- Search Terms: "sustainable farming" or "organic farming"
- Specifications: 1920x1080, showing farmers at work
- Mood: Authentic, hardworking, hopeful

Recommendation: Show diversity of sustainable farming approaches.

Pillar 4: Food Waste Elimination Images

Image 1: Food Rescue Operation

- Recommended Source: Unsplash, Pexels
- Search Terms: "food rescue" or "food bank"
- Specifications: 1920x1080, showing food distribution
- Mood: Community-focused, helpful, impactful

Image 2: Composting Facility

- Recommended Source: Unsplash, Pexels
- Search Terms: "composting" or "organic waste"
- Specifications: 1920x1080, showing composting process
- Mood: Sustainable, circular, natural

Image 3: Community Garden

- Recommended Source: Unsplash, Pexels
- Search Terms: "community garden" or "urban farming"
- Specifications: 1920x1080, showing diverse people gardening
- Mood: Community, inclusive, productive

Recommendation: Show multiple approaches to food waste reduction.

Pillar 5: Circular Economy Images

Image 1: Repair Shop

- Recommended Source: Unsplash, Pexels
- Search Terms: "repair shop" or "sustainable business"
- Specifications: 1920x1080, showing repair in progress
- Mood: Sustainable, resourceful, modern

Image 2: Recycling Facility

- Recommended Source: Unsplash, Pexels
- Search Terms: "recycling" or "waste management"
- Specifications: 1920x1080, showing recycling process
- Mood: Organized, sustainable, hopeful

Image 3: Sustainable Product Design

- Recommended Source: Unsplash, Pexels
- Search Terms: "sustainable design" or "eco-friendly products"
- Specifications: 1920x1080, showing sustainable products
- Mood: Modern, innovative, beautiful

Recommendation: Show both process and products of circular economy.

Impact Section Images

Image 1: Global Community Map

Purpose: Show worldwide reach

Specifications:

- Format: Interactive or static world map
- Dimensions: 1400x700 pixels
- File Format: SVG (interactive) or PNG (static)
- Color Scheme: Green/teal for engaged regions

Data to Show:

- 150+ countries engaged
- 2.3M+ community members
- Regional distribution
- Partner organizations

Recommended Approach:

Option 1: Create Custom Map

- Use Figma or Adobe Illustrator
- Create world map with highlighted regions
- Add data points and statistics
- Cost: $500-$1,500
- Timeline: 1-2 weeks

Option 2: Use Interactive Map Tool

- Mapbox: https://www.mapbox.com/
- Google Maps: https://www.google.com/maps
- Leaflet: https://leafletjs.com/

Recommendation: Create custom SVG map in Figma for brand consistency.

Image 2: Member Growth Chart

Purpose: Show community growth over time

Specifications:

- Format: Line chart
- Dimensions: 1200x600 pixels
- File Format: SVG or PNG
- Color Scheme: Green gradient

Data Points:

- 2020: 100,000 members
- 2021: 500,000 members
- 2022: 1,000,000 members
- 2023: 1,800,000 members
- 2024: 2,300,000 members
- 2025 projection: 3,000,000 members

Recommended Approach:

- Create line chart showing growth trajectory
- Add milestone markers
- Include growth rate annotations
- Use brand green color

Recommendation: Create custom infographic in Figma.

Image 3: Impact Metrics Dashboard

Purpose: Show key achievements

Specifications:

- Format: Dashboard or card layout
- Dimensions: 1200x800 pixels
- File Format: PNG or interactive HTML
- Color Scheme: Brand colors (green, blue, teal)

Metrics to Display:

- CO_2 equivalent prevented
- Trees planted

- People engaged
- Countries reached
- Renewable energy capacity
- Food waste diverted

Recommended Approach:

- Create dashboard design in Figma
- Use cards for each metric
- Add icons and visual elements
- Include growth indicators

Recommendation: Create a custom dashboard in Figma.

PART 2: INFOGRAPHIC SOURCING & CREATION

Infographic Creation Process

Step 1: Define Specifications

- Dimensions and aspect ratio
- Color scheme (match brand)
- Data points and sources
- Visual style (flat, illustrated, 3D, etc.)

Step 2: Create in Design Tool

- Figma (recommended, free tier available)
- Adobe Illustrator (professional)
- Canva (simple, template-based)
- Cost: Free to $100+/month

Step 3: Optimize for Web

- Export as SVG (scalable, interactive)
- Or export as high-res PNG (1200x600 minimum)
- Optimize file size (under 200KB)
- Test responsiveness

Step 4: Implement on Website

- Embed SVG directly in HTML
- Or use as image with alt text
- Add captions and descriptions
- Ensure accessibility

Recommended Infographic Tools

Figma (Recommended)

- Website: https://www.figma.com/
- Cost: Free tier available
- Features: Collaborative, vector-based, export options

Canva

- Website: https://www.canva.com/
- Cost: Free tier,
- Features: Templates, drag-and-drop, easy to use

Adobe Illustrator

- Website: https://www.adobe.com/products/illustrator.html
- Cost: $22.49/month (Creative Cloud)
- Features: Professional, powerful, industry standard
- Best For: Complex, custom infographics

Piktochart

- Website: https://piktochart.com/
- Cost: Free tier, $39-99/month paid
- Features: Data visualization, templates, interactive
- Best For: Data-heavy infographics

Infographic Specifications Summary

Infographic	Dimensions	Format	Purpose
CO_2 Levels Chart	1200x600	SVG/PNG	Show rising CO_2

Infographic	Dimensions	Format	Purpose
Temperature Rise	1200x600	SVG/PNG	Show warming trend
Emission Sources	800x800	SVG/PNG	Show emission breakdown
Pillar Process Diagrams	1200x400	SVG/PNG	Show how solutions work
Impact Comparison	1000x400	SVG/PNG	Compare pillar impacts
Global Reach Map	1400x700	SVG/PNG	Show worldwide presence
Member Growth	1200x600	SVG/PNG	Show community growth

PART 3: VIDEO PRODUCTION SPECIFICATIONS

Video 1: Hero Video (30-60 seconds)

Purpose: Capture attention, communicate urgency, inspire action

Specifications:

- Duration: 30-60 seconds
- Format: MP4, WebM
- Resolution: 1920x1080 (Full HD) minimum, 4K preferred
- Frame Rate: 24fps or 30fps
- File Size: Optimized for web (under 50MB)
- Aspect Ratio: 16:9

Message Arc:

1. **Opening (0-5 seconds):** "The climate crisis is real"

    - Visual: Earth from space or climate impacts
    - Audio: Dramatic music, sound effects

2. **Middle (5-25 seconds):** "But solutions exist"

    - Visual: Renewable energy, sustainable agriculture, community action
    - Audio: Inspiring music, positive tone

3. **Closing (25-30 seconds):** "Join us"

    - Visual: Website URL, social media, CTA
    - Audio: Uplifting music, clear voiceover

Production Approach:

Option 1: Stock Footage + Editing

- Use stock video footage from Shutterstock, Getty, etc.
- Edit in Adobe Premiere Pro or DaVinci Resolve
- Timeline: 1-2 weeks
- Quality: Good, professional

Option 2: DIY with Smartphone

- Shoot original footage with smartphone
- Edit in Adobe Premiere Rush or CapCut
- Cost: Minimal (DIY)
- Timeline: 1-2 weeks
- Quality: Acceptable, less professional

Recommended Approach: Option 1 (stock footage + professional editing) for best balance of quality and cost.

Video 2: Explainer Video (2-3 minutes)

Purpose: Educate viewers about one of the five pillars

Example: Pillar 1 - Fossil Fuel Phase-Out

Specifications:

- Duration: 2-3 minutes
- Format: MP4, WebM
- Resolution: 1920x1080 (Full HD)

- Frame Rate: 24fps
- File Size: Optimized for web
- Aspect Ratio: 16:9

Content Structure:

1. **Title Card (0-5 seconds)**

    - Title: "Fossil Fuel Phase-Out"
    - Visual: Animated text + relevant imagery
    - Audio: Intro music

2. **Problem (5-30 seconds)**

    - Why fossil fuels are problematic
    - Data: CO_2 emissions, climate impact
    - Visual: Coal plants, oil rigs, pollution
    - Audio: Voiceover (professional voice talent)

3. **Solution (30-90 seconds)**

    - How renewable energy works
    - Types: Solar, wind, hydro, geothermal
    - Visual: Animated diagrams, real-world footage
    - Audio: Voiceover, background music

4. **Impact (90-120 seconds)**

    - What results are possible
    - Statistics: % emissions reduction, jobs created
    - Visual: Success stories, global examples
    - Audio: Voiceover, inspiring music

5. **Call-to-Action (120-180 seconds)**

    - How to get involved
    - Visual: Website URL, social media
    - Audio: Uplifting music, clear CTA

Production Approach:

Option 1: DIY Animation

- Use animation software (Adobe Animate, Blender, etc.)
- Cost: $500-$2,000 (software + learning)
- Timeline: 2-4 weeks
- Quality: Good, custom
- Requires: Animation skills

Option 2: Animated Explainer Service

- Use services like Wistia, Animaker, or Powtoon
- Cost: $500-$2,000 per video
- Timeline: 1-2 weeks
- Quality: Good, template-based
- Includes: Templates, voiceover, editing

Recommended Approach: Option 3 (animated explainer service) for faster turnaround.

PART 4: STOCK PHOTO SOURCES & RECOMMENDATIONS

Free Stock Photo Sites

Unsplash

- Website: https://unsplash.com/
- License: Free for commercial use (CC0)
- Quality: Excellent
- Categories: Extensive (10,000+ photos)
- Recommended For: Climate, nature, people, technology
- Best For: High-quality, diverse imagery

Pexels

- Website: https://www.pexels.com/
- License: Free for commercial use (CC0)
- Quality: Very good
- Categories: Extensive
- Recommended For: Nature, environment, people
- Best For: Diverse, authentic imagery

Pixabay

- Website: https://pixabay.com/
- License: Free for commercial use (CC0)
- Quality: Good
- Categories: Extensive
- Recommended For: General imagery, illustrations
- Best For: Large library of options

Flickr Creative Commons

- Website: https://www.flickr.com/
- License: Creative Commons (various)
- Quality: Variable
- Categories: Extensive
- Recommended For: Specific searches, user-generated content
- Best For: Finding specific imagery

Recommended Search Strategies

For Climate/Environment Images:

- Search: "climate change," "renewable energy," "sustainability," "environmental protection"
- Best Sources: Unsplash, Pexels, Shutterstock

For People/Community Images:

- Search: "diverse people," "community action," "teamwork," "activism"
- Best Sources: Unsplash, Pexels, Shutterstock
- Tip: Use filters for diversity and authenticity

For Technology Images:

- Search: "solar panels," "wind turbines," "technology," "innovation"
- Best Sources: Unsplash, Pexels, Shutterstock

For Nature Images:

- Search: "forest," "nature," "landscape," "environmental restoration"
- Best Sources: Unsplash, Pexels, Pixabay
